

TOURER SP

Ideal for a couple or a couple with one child. There is a double bed plus the dinette converts into a single bed.

The Tourer allows you to do just that. You can camp at out of the way places where there are no electricity points as you have your own battery system that charges while you are driving. It will power your 60 litre fridge/freezer, your interior and patio lights and your water pump.

You also have a pull out kitchen and the pull out fridge/freezer can be accessed from either inside or outside.

The pull out side awning comes as standard.

The Tourer is all Sprite to tow – its tare is just 1081 kg and its low profile roof cuts wind drag dramatically. On site the Tourer is easy to manoeuvre into position and simplicity itself to set up for the night.
